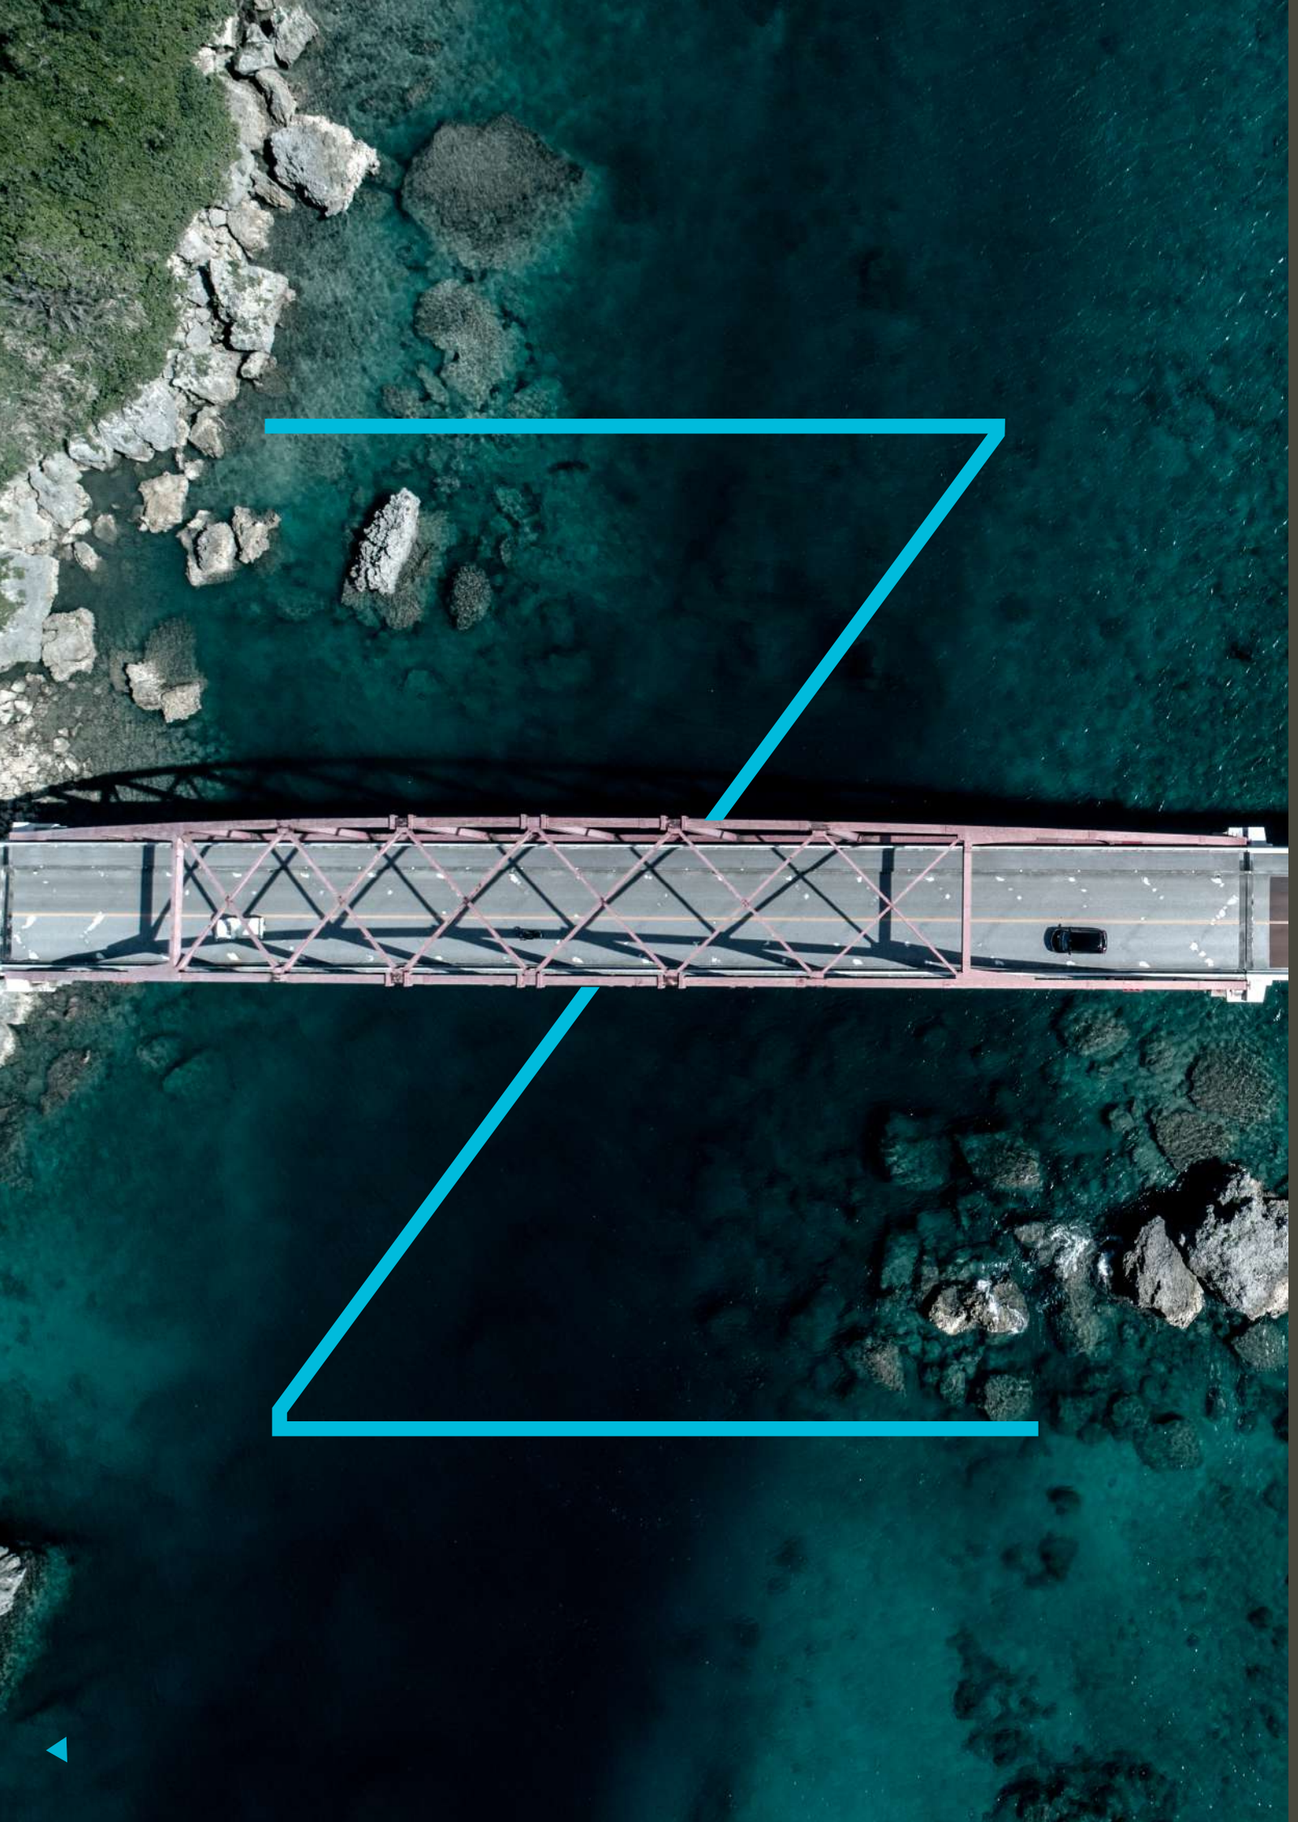
gonzalez calvillo



We are proud of being the challenger law firm.
We question the status quo. No ordinary result satisfies us.
We are adaptable, business driven and audacious.
We do not strain efforts on making our clients succeed
and seeing our people motivated.

That's how we win the confidence of our clients and lawyers.
Working collaboratively brings us more opportunities.
We find solutions for every problem. We create an incomparable
work environment. We share knowledge and opportunities.

But we are not a team because we work together. We are a team
because we respect, trust and care for each other. And we take this concept
inside out. Employees, partners, clients, society. After all, they are all people.
That's why we strive to creative positive and upbeat relationships.

But in the end, it's not about us. It's about your challenges.

Our services are designed to help you solve your toughest and most
complex legal issues, surpassing your needs and business objectives.
We establish a close and strategic alliance to enable your company to achieve more.
